Welcome to the Middlesex Pathway booklet for 2017

Dear Middlesex Club, Schools, Players and Parents,

The purpose of the booklet is twofold; firstly to provide an overview of the pathway and secondly, to explain the ethos and objectives behind the MCCC Pathway. Since the pathway's relaunch in 2012, there has been a significant increase in the number of players who are able to access cricket above club level. This allows talented young players to test their skills against peers of a similar ability from across the county, creating a platform for them to improve their games. Through this player pathway, Middlesex Cricket aims to create healthy competition for places at every level, across a number of age groups, and helps to identify, nurture and grow cricketers in the future.

The Middlesex CCC Player Pathway has three main objectives;

- Player Development - above all else, the pathway exists for players to challenge themselves with and against players of a similar ability. To develop their current level of cricket, through quality match play and training.
- Talent ID - A fluid process where identified players are selected to move onto the next level. Players get to see the standard and aspire to the next level.
- First association with MCCC - to develop a wider, positive connection with Middlesex Cricket, all Middlesex players have London on their postcode.

It is important that all players, parents, coaches and managers involved in the Middlesex Pathway are aware of:

Pride – The Middlesex Cricket DNA

Angus Fraser MCCC Managing Director of Cricket, created the Pride document following lengthy discussion with influential people associated with Middlesex Cricket across a 30-year period. As someone who is associated with the Club through the Player Pathway in the roles listed above, we ask you to read through each of these points carefully and at all times see yourself as an ambassador of MCCC, and act in a way that shows you have Pride in the Club, Yourself and the Game of Cricket. Being involved in the pathway means that you are an ambassador for Middlesex Cricket, and we expect standards of conduct and behaviour that reflect these values.

Selection

Selection in to any elite pathway will always be an area that divides opinion, and will include a subjective decision covering a number of different areas. These could include the players potential to improve, current performance, athleticism, ability to learn and be coached, ability to fulfil a number of roles in the game and work ethic.

The biggest challenge we face is the huge numbers of cricketers across the County. To put this in perspective, there are roughly 3,000 people at every age group playing competitive cricket, selection into one of the ten Borough Squads will mean being in the top 150 players two age groups. The next tier in the Pathway the numbers drop down to four regions, meaning a drop down to 60 across two age groups across the County.

Elite levels of sport are not fair, and the programmes are not designed to be equal opportunities for all. Often players will be treated differently due to their perceived potential to improve, unlike many other areas of life that a young person will experience.

We hope that every player who plays, Borough/Regional or County Youth Cricket in 2017 enjoys the embrace the challenge, learn from the experience and continue to strive to improve your game.
